“Some of my favorite Michigan wine memories include visiting local tasting rooms and connecting with winemakers and others in the industry, but my most treasured memory is proposing to my wife just outside the Mawby tasting room during a day spent exploring wineries on the Peninsula!”

2. What are some essential services Howard & Howard offers to Michigan wine growers and producers?

Howard & Howard is a full service business law firm. The firm offers a wide range of specialized legal services tailored to the unique needs of Michigan's wineries, growers, vintners, distributors, and the many vendors and suppliers that support them. Just some of the practice areas include navigating licensing and regulatory compliance with the Michigan Liquor Control Commission, intellectual property protection to safeguard wine labels and branding, assistance with business formation, expansion, and transactions, and the numerous day-to-day business issues and disputes that arise. The firm also provides expertise in contract negotiation, real estate transactions, and employment law, among other specialties, helping wineries, vineyards, and other businesses operate efficiently and sustainably while mitigating risk.

3. What are some of your favorite Michigan wines and/or Michigan wine memories?

Myself and many of my law partners are big fans of Michigan wines and the experiences the industry creates. From enjoying crisp whites while visiting the Leelanau Peninsula and Old Mission Peninsula, to trying a new Michigan wine at a local restaurant, we take pride in celebrating the diversity and quality of Michigan's wine offerings. Some of my favorite Michigan wine memories include visiting local tasting rooms and connecting with winemakers and others in the industry, but my most treasured memory is proposing to my wife just outside the Mawby tasting room during a day spent exploring wineries on the Peninsula!

Unoaked chardonnay looking over Grand Traverse Bay, what's better than great company & wine with a breath-taking view. SOME WORDS FROM VANCE

"WHEN I FIRST STARTED WORKING AT VANCE METAL OVER 8 YEARS AGO, I PRESENTED TO THE MANAGEMENT TEAM ABOUT THE IMPORTANCE OF SUPPORTING ORGANIZATIONS LIKE MWC WHO SUPPORT OUR CUSTOMER BASE WITHIN THE INDUSTRY. WHEN WE HAVE A LOYAL GROUP OF CUSTOMERS WHO CONTINUE TO SUPPORT US AND THE PRODUCTS WE MAKE, I BELIEVE IT IS VERY VALUABLE TO GIVE BACK TO ORGANIZATIONS THAT WORK TO HELP MOVE THOSE INDUSTRIES FORWARD." -ETHAN POOLE
VANCE METAL

What kind of opportunities does the MI wine industry offer Vance? And what kind of opportunities can Vance offer the MI wine industry?

The Michigan Wine Industry has a long history with well-established wineries and vineyards. We have helped wineries grow and expand and with new wineries starting there are opportunities to replicate the work we have done with our customer base. Vance Metal Fabricators has been supplying the Michigan Wine Industry with tanks and cellar equipment for around 20 years. We offer quality, truly American made stainless steel fermenters and carbonation tanks, that are hand fabricated at our shop in Geneva NY. We build every order to the customers specifications, which gives them the ability to customize their tanks to fit the spaces and overall needs.

Do you have any favorite Michigan wines or Michigan wine memories?

I try to visit MI at least once a year to discuss opportunities with our long-term customer base as well as learn about new endeavors and meet new people in the industry. I really love the Traverse City area and the two growing regions on the Peninsula's but would like to explore other regions around the state. There are many great producers of wine in MI with some very unique wine being made, I do not have a favorite specific wine but enjoy trying wines that I have never had before.

What are some cool products and services Vance offers MWC members?

One thing that Vance Metal offers is the ability to customize each tank that a customer would need. Many wineries have unique production spaces and overall needs, so being able to design and build equipment that fits into their facilities is important and sets us apart from other companies that just offer products out of their inventory. We also fabricate our tanks from heavier gauge materials to create a robust tank that is sturdy and will last the lifetime of an operation. Winemakers have had good success with our specialized Tapered Style red wine fermenters, giving them increased cap management and pump overs options.
